

Want to know a secret?

Yes! But my internet is blocked.

Not with **Orbot** on Android!

1.

Visit the **Tor** bridges website. Scroll to the bottom to look for the *obfsproxy bridges* link.

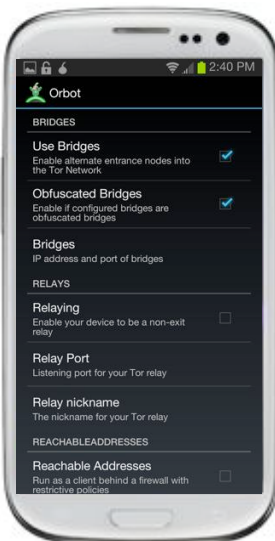

OR

Email *bridges@torproject.org*. In the body, write "transport obfs2".

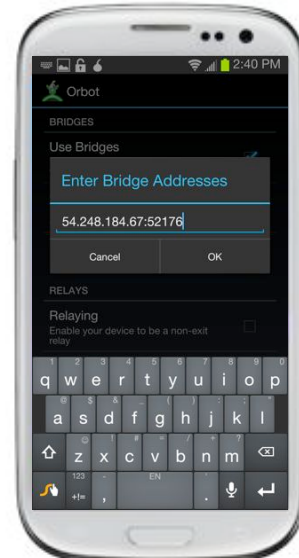

2.

Open the **Orbot** app on Android and go to the settings. Turn on normal & obfuscated bridges.

3.

Enter the bridge info we sent you. It should look like: 54.248.184.67:52176

4.

Start **Orbot** with a long press of the button. It should turn green & let you know that bridges are enabled! Now use **Orweb** to surf freely.
